

The *Wave clothes rack* is an inventive new space saving rack that removes the protruding stabilising legs of contemporary clothes racks. The simple fluid line of the base contrasts elegantly with the vertical and horizontal rail, marrying beautifully together to form a gracefully dancing ribbon of steel.

Made from stainless steel tube and easily assembled in a matter of minutes without the need for tools, the *Wave clothes rack* can be combined with the *Wave clothes hanger* to ideally suit elegant hotels, office receptions or the contemporary home where style is important.
